Personal Profile

I am an enthusiastic and self-motivated individual, recently graduated with a First Class Honours in BSc in Information and Communications Technology from the University of Greenwich, London. Having developed academic knowledge of a range of front and back end systems and technologies, I am now keen to join an innovative business where I can contribute on a practical level.

I am confident grasping new technologies quickly and have a proven ability as a team player, developed working in two key roles within University departments. Through my practical dissertation I have experience of scoping and managing projects and understand the need for clear deliverables. I work effectively to deadlines and have experience of managing a variety of stakeholders. My work on feasibility studies and requirement gathering has developed my communication skills; working in different teams has developed my confidence in communicating with a wide range of people. I am open-minded and ambitious, with a drive for technology development with experience in database administration and data analysis using Microsoft SQL Servers and Microsoft Access as well Web development using ASP.net, HMTL5, XHTML and CSS3. I have a working knowledge of coding using C# Object Oriented Programming language which I have used to program a Tax Calculator using Microsoft Visual Studio Graphic User Interface.

Education History

2012-2015: BSc Information & Communications Technology; University of Greenwich: First Class Honours

Dissertation: Development of a Mentoring Web application for the Business School, University of   Greenwich.

Awarded Second Runner-up for Best Dissertation Project in the Faculty.

The dissertation involves the development of a web application for the career mentoring scheme of the Business School, University of Greenwich. It involves development and administration of a database which will hold data on student, mentors and staff and would be designed and developed using MS SQL Servers. The web page would be designed using HTML5 and CSS 3 parameters and would be coded within the MS Visual Studio GUI. The application will be an ASP.net application which would integrate the web pages (as .aspx) and the database.
